## ARGAL ITALY PUMPS

ARGAL boasts forty years of activity in the invention and production of pumps made of thermoplastic material, compounds and corrosion-resistant metal alloys. During the past decade, significant efforts were directed to research and development on the entire production and such an effort resulted in entirely new or renovated pump ranges.

Since its foundation SIMPAC has become a stable business corporation despite the ups and downs of the South Korean economy. In the meantime, SIMPAC is globally recognized not only in the world of metal forming technology but also in the field of iron and steel production and the manufacturing of industrial machinery.
